Commercial

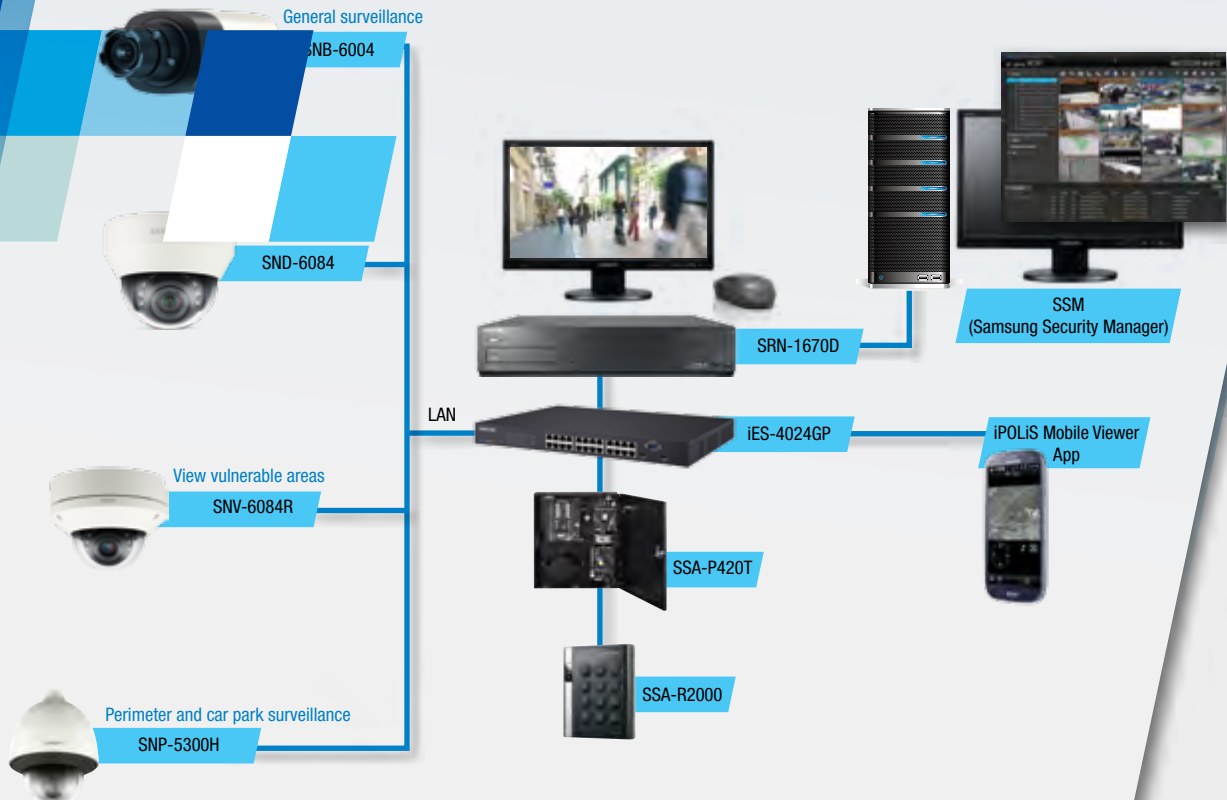

Property Security Solution

Small offices • Large office complexes • Data Centres • Banks

Samsung's comprehensive range of access control and video surveillance solutions provide commercial organisations with a powerful set of tools to deter and detect criminal activity. Incorporating the very latest advances in technology, Samsung products are designed to be easy to install, and even easier for security personnel to use as part of their endeavours to protect assets and create a safe and secure working environment.

Commercial

- High definition cameras to monitor and obtain evidence grade video of intruders
- Weatherproof and vandal resistant cameras and domes for car parks and open spaces
- Low light Day/Night cameras for 24/7 protection
- License-free software to enable remote viewing of live or recorded video
- Integrated access control systems to prevent unauthorised access to sensitive areas

The latest generation of Samsung's video surveillance products provide customers with the option to cost-effectively upgrade an existing analogue system or to migrate to a fully integrated IP based video surveillance solution.

A key feature of video over IP technology is the ability to control cameras and view live or recorded images from anywhere on the network. The availability of the Samsung mobile apps means that video can also be streamed to a smartphone or tablet.

Access Control

Samsung offers a choice of access control systems utilising fingerprint recognition, proximity and smart card & PIN, as well as time and attendance options. Our biometric fingerprint access control reader capability is particularly impressive in that it can hold up to 4,000 fingerprint templates and yet have a read time of just half a second.

Software

Samsung Access Management Software (SAMS) is fully compatible with selected Samsung SRN series network video recorders, ensuring that high quality recorded images are always time synchronised with related access control alarm events. This important feature allows users to quickly find footage that relates to an event, which may have occurred several seconds, minutes or even hours before. Users can also rewind or forward footage to before or after the actual event they wish to view.

Support

Offering 'Best of Class' products and solutions is only one part of the process of delivering Samsung Smart Security. Every one of our products, many of which have been highly rated in independent product tests, is backed by unbeatable pre and post sales support. We can offer your preferred installer a range of support services which includes; training, free system design, free technical support and a full three-year warranty on all products.
